

2008 - IFRA Ingredient Transparency List - 2011

Below is a list of 3090 materials that were reported to be used in fragrance compounds by IFRA members in a 2008 voluntary survey. IFRA members are responsible for possibly 90% of the world's fragrance production. The list was updated in 2011 and they say they will occasionally update it again with info from future surveys.

There could be ingredients used in fragrance manufacture that are not on this list.
